04 Laboratory Technician – Water Analysis

Training Modules

- Physico-chemical analysis of water
- Microbiological analysis
- Drinking water quality standards

Minimum Entry Level

- Scientific Baccalaureate level recommended.
- Basic concepts in chemis-try/biology

Duration
3 Months

Diploma
Professional Qualification Certificate (CQP)

Career Opportunities

- Laboratory Technician
- Quality control agent
- Employed in processing plants
- NGOs / water and health projects

05 Biomedical Waste Management Technician

Training Modules

- Hospital waste management
- Design of treatment areas
- Safety and environmental hygiene

Minimum Entry Level

- Minimum BEPC
- Sense of responsibility and hygiene

Duration
3 Months

Diploma
Professional Qualification Certificate (CQP)

Career Opportunities

- Hospital Hygiene Agent
- Medical waste manager
- Public health NGO
- Junior Environmental Consultant

06 Hydraulic Modeling Technician

Training Modules

- Introduction to hydraulic networks
- Using the software EPANET
- Simulation of water systems

Minimum Entry Level

- Scientific Baccalaureate level recommended.
- Basic computer skills

Duration
3 Months

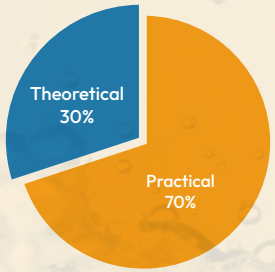

Diploma
Professional Qualification Certificate (CQP)

Career Opportunities

- Assistant Hydraulic Engineer
- Design office technician
- Junior hydraulics consultant

EDUCATIONAL ORGANIZATION

Teaching Approach

Methods

- Practical exercises
- Case studies
- Field simulations
- Real-world projects

Evaluation Methods

- Continuous assessment
- Practical assessment
- Final project

ABOUT US

Water Sanitation Energy

"FROM RESEARCH TO DRINKING WATER"

We offer complete solutions in water, sanitation, and water quality, combining field expertise with high-performance equipment. Our goal is to effectively meet the needs of communities, organizations, and private stakeholders with sustainable, tailored solutions.

Our Services

- Water quality analysis and monitoring.
- Laboratory analysis, field assessment for hospitals, schools, construction sites, agri-food factories, and households, to ensure access to safe drinking water.
- Water and sanitation infrastructure Design, supervision, and rehabilitation of systems such as: boreholes/drilling, latrine systems and water distribution networks.

Our Products

Water purifiers (Mini RO filters)

Aquatabs/chlorine

Solar panels

Replacement cartridges

OUR TRAINING COURSES

01 Water Technician, Hygiene and Sanitation (WASH)

Training Modules

- Water quality test.
- Water treatment techniques.
- Construction of improved latrines.
- Design of water kiosks.
- WASH project management (beginner level).

Minimum Entry Level

- BEPC / CAP or equivalent.
- Knowing how to read and write French.
- Motivation for fieldwork.

Duration **3 Months**

Diploma **Professional Qualification Certificate (CQP)**

Career Opportunities

- Technician WASH in NGOs/humanitarian projects.
- Hygiene and health facilitator.
- Contractor (latrines, kiosks, water services).

02 Water Supply System Technician

Training Modules

- Community gravity systems.
- Solar water supply systems.
- Simple source systems.
- Rainwater harvesting and storage.

Minimum Entry Level

- Minimum BEPC.
- Basic concepts in Recommended mathematics.

Duration **3 Months**

Diploma **Professional Qualification Certificate (CQP)**

Career Opportunities

- Hydraulic Systems Installer.
- Technician in NGOs/projects rural.
- Provider of Drinking water Solutions.
- Self-employment (system installation).

03 Drilling and Hydrogeology Technician

Training Modules

- Geophysical studies.
- Applied Hydrogeology.
- Drilling techniques.
- Practical tests of pumps.

Minimum Entry Level

- Scientific Baccalaureate level recommended.
- Good physical condition

Duration **3 Months**

Diploma **Professional Qualification Certificate (CQP)**

Career Opportunities

- Drilling Technician
- Assistant hydrogeologist
- Field agent in water projects
- Drilling company
